

## DERMALASE IPL

We use medical grade equipment with the goal of providing affordable yet effective treatments for men and women of all skin types. Before your first treatment you will need a short 15 min consultation to assess your skin type and your suitability for treatment, in addition to determining your goals and our treatment plan.

Treatments Include:

- Hair Removal
- Folliculitis (ingrown hairs)
- Collagen remodeling
- Fine Lines
- Dull Skin
- Pigmentation
- Freckles
- Age Spots
- Melasma
- Rosacea
- Broken Capillaries (spider veins)
- Scars

## PRE & POST CARE

- Cease any excessive sun exposure for 4 to 8 weeks prior to treatment
- No tanning products for 2 weeks prior to treatment
- Notify staff of any medications that may cause photo sensitivity
- No treatments during pregnancy
- Shave 24 hours prior to treatment
- Avoid excessive exercise, friction that may cause profuse sweating for 24 - 72 hours after treatment
- No hot baths or showers for 24 - 72 hours after treatment
- No Perfume, lotions, or make-up for 24 hours after treatment except mineral make-up and aloe lotion
- Use SPF 30 sunscreen for all sun exposed areas.

## SKIN REJUVINATION

### PHOTO REJUVENATION (Pigmentation, Freckles, Age Spots, Melasma, Rosacea, Broken Capillaries, Scars)

For the best results recommend treatments in a series of 1-3 sessions 3-4 weeks apart. The treatment will attract the melanin (pigment) and bringing it to the surface of the skin, therefore the pigment will get darker right away as a good end result. The lighter the skin the darker the pigment the better the target so NO SUN EXPOSURE is recommended during the process. Especially 14 days prior too or 14 days after.

### SKIN TIGHTENING (Fine Lines, Dull Skin)

Skin Tightening is best done in a series of 4-6 treatments 4 weeks apart. The reason for this is that we are bulk heating the collagen, it takes the collagen about 4 weeks to reach the surface and then we can hit it again. We are attracting the water in the skin and pulling it to the surface creating a tighter, plumper appearance.

**SPF is mandatory** due to the fact that we are activating melanocytes. This means if you don't wear SPF after, the pigment may come back full force. SPF also breaks down collagen and we are trying to rebuild it. After the treatment you may experience heat in the skin and a slight tingly feeling for up to 8hrs as the pigment continues to darken. This is normal, use cold compress or soothing mask. Be sure not to be in chlorine, hot tubs, hot showers or use highly fragrant lotion on the area (treat it like a mild sunburn) for 24-48hrs as it will irritate. Use a mild cleanser and soothing moisturizer post treatment.

## LASER HAIR REMOVAL

We Recommend 6-8 sessions around 4-8 weeks apart.

No waxing, sugaring or tweezing throughout services as we need the bulb of the hair.

The lighter the skin, the darker the hair the better the target so NO SUN EXPOSURE is recommended during the process. Especially 14 days prior or 14 days after.

**SPF is a must.** After the treatment you will experience some mild redness, minimal swelling and possibly smell some hair burning throughout. These are signs of a good end result.

Be sure not to be in chlorine, hot tubs, hot showers or use highly fragrant lotion on the area (treat it like a mild sunburn) for 24-48hrs as it will irritate. You may use Aloe Vera as a soothing lotion.
